Letter of Intent – Partnership

H3 Health Hub - A Helmholtz Transfer Academy - is a joint program of all six Helmholtz Health centers. Together, we enable researchers, employees and aspiring entrepreneurs to successfully transfer results from the lab into business.

We provide a platform for community, learning, events and collaborative projects in this field. Our team includes experts from technology transfer, innovation management and human resources development from all centers to cover the entire development process of aspiring entrepreneurs. In addition, we are supported by an advisory board of experts who provide us with strategic support. Our partners from the regional and national life science ecosystems are integrated closely throughout the process.

We, _____ [organization/company], support the above-mentioned vision and activities and hereby confirm to H3 Health Hub that we will be involved as a cooperation partner with immediate effect in this project phase (April 1st, 2023 - March 31st, 2026) and, if necessary, the following one.

We want to actively support the project by informing the H3 Health Hub program management about our offers, opening our offers to the H3 community, and making H3 Health Hub known in our network. Your contact person on our side is: _____
[Name, Function, Email]

We look forward to working together as part of the initiative!
